

Notice

We would like to use this opportunity to thank all those involved in creating the first volume of *Biolinguistics* and all the work that went into preparing the entire endeavour over the past year and a half or so. For internal quality control, our gratitude goes to the reviewers that have served us in 2008, who are listed below. For everything else, we thank our supporters listed below as well as all active participation and feedback from the members of the *Biolinguistics* Advisory Board, the *Biolinguistics* Editorial Board, and the *Biolinguistics* Task Team that are not specifically mentioned by name.
